

I do not feel that xm's weather and traffic is in any way in conflict with local broadcasting. I have had xm for over 2 years, and in that 2 years I haven't listened to regular radio. Since then I've purchased two more xm receivers. One for my mom (who uses more than tv now,) one for my neice and just about to order one for my sister and her husband. They all agree with me on this issue. So please reconsider any action against xm radio.
